

# Travis Allen

Powered By  launch\_code

Software Engineer in St. Louis, MO

My personal and professional goal is simple: Search out opportunities to be creative, and develop new tools that will allow me to expand on that creativity.

## PROJECT EXPERIENCE

### Blogz — Launchcode

- Blogz was a project undertaken during LC101. It allows a user to login, and to create and display a list of personal blog posts.
- Built using Python, Flask, HTML, CSS, and MySQL.

### Cheese-MVC — Launchcode

- Cheese-MVC was another project undertaken during LC101. It allows a user to create, remove, and edit a list of items.
- Built using Java 8, Spring Boot, HTML, CSS, and MySQL.

### Capstone Project — Liftoff!

- The Capstone Project is a personal project built during Liftoff!, the complement course to LC101. My capstone project organizes all classes, assignments, and due dates for a single college semester. It allows a user to create an account, login, add classes, add assignments, display all assignments, and display all assignments for each class on individual class pages.
- Built using Java 8, Spring Boot, HTML, CSS, and MySQL.
